**Office hours:** On Tuesday from 9.30 up to 11.30. Every day by appointment (by email)

#### **Academic career**

**03/01/2005 – 05/02/2020, Assistant professor**, SSD ING-IND/24 Fundamentals of Chemical Engineering, University of Calabria.

**01/03/2002 – 03/01/2005, Research fellowship**, S.S.D. ING/IND 24 concerning “Development of rheological models for food systems”, Department of Chemical and Materials Engineering, University of Calabria.

**01/2001 – 12/2001, Post-doc fellowship** concerning “Sterilization models of cherry tomatoes” (CRATI s.c.r.l.), Department of Chemical and Materials Engineering, University of Calabria.

**11/1997 – 10/2000, PhD in Chemical Engineering** (Cycle XIII) concerning "Rheology of food gels", University of Napoli “Federico II”; research activities carried out at the Department of Chemical and Materials Engineering, University of Calabria.

#### **Research activity**

Research activity is focussed mainly on study and modelling of transport phenomena and material properties in complex systems with particular attention to food engineering and rheology of weakly structured systems. The activities can be divided in two main areas: investigation on material properties with the aim of designing novel systems (“product design”); investigation on process conditions to optimize existing processes or to design new ones (“process design”). In the area of product design he is involved mainly in the rheological characterization and modelling of multiphase structured systems such as: suspensions, emulsions, emulgels, bigels, doughs, etc. to be used in different industrial areas (foods, cosmetics, bitumens, etc.). He is coauthor of 58 papers in international journals, more than 150 contributions in proceedings of International and National refereed conferences, one international patent concerning a novel apparatus for rheological properties determination and one international patent concerning a novel structured and healthy fat system with low saturated fat content, 5 book chapters.

#### **Teaching activity**

Teaching activity focussed on topics concerning the scientific area of Fundamentals of Chemical Engineering, concerning Rheology, Chemical Reactors, Thermodynamics and Transport Phenomena within the Bachelor and Master in Chemical Engineering, bachelor in Food Engineering, Master in Science and Engineering of Innovative and Functional Materials.

Current courses:

*Master in Science and Engineering of Innovative and Functional Materials (LM-53)*

**Rheology** (I year), Course instructor from academic year 2016/17 up to now

**Modeling of production processes and transformation of complex materials** (II year), Course instructor in academic year A.A 2015/16, collaboration to course activity (34 hours) in academic year 2019/20

*Bachelor in Food Engineering (I-9)*

**Thermodynamics of Food Systems** (II year), Course instructor from academic year 2018/19 up to now

### **Other activities**

**Vice-coordinator** of the Degree Course Council in Food Engineering

**Secretary of Italian Society of Rheology** since 2004 up to now.

**Member of ESR (European Society of Rheology) Committee** for the period 2018-2021.

### **Publications**

The list of publications is reported in <https://iris.unical.it/cris/rp/rp12361>, here a short list of papers in international journals for the period **2015-2020** is shown:
